

Baraboo-Dells Flight Center

Flight Maneuvers for:

N3062X

1966 Cessna 150F

November, 2003

**Baraboo-Dells Flight Center
Baraboo, WI 53913**

INTRODUCTION

This manual was created to assist pilots in training with recommended procedures in accomplishing maneuvers required for most practical flight exams. It also serves as a quick reference to information on our Cessna 150 and covers important policies and procedures that are critical to the safe operation of our aircraft. *In no way, shape or form is this meant to replace the Pilot's Operating Handbook (POH).* When in doubt, pilots should first refer to the aircraft's POH for information.

We hope you find this manual useful. Please offer us your feedback or recommendations to help this manual serve you better. Happy flying!

-The BDFC Crew

CONTENTS

Chapter I -

| | |
|------------------------------------|---|
| V-Speeds and V-Speeds Defined..... | 1 |
|------------------------------------|---|
